Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claims 1-4 are pending in this application.

Drawings

1. The drawing(s) filed February 24, 2004 are accepted by the Draftsperson under 37 CFR 1.184 or 1.152.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1 and 2 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 6 and 11 of U.S. Patent No. 6,733,780 B1. Although the conflicting claims are not identical, they are not patentably distinct from each other because both the instant application and the prior art patent are directed towards a tablet comprising a cross-linked poly(allylamine) or pharmaceutically acceptable salt thereof.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-4 are rejected under 35 U.S.C. 102(e) as being anticipated by Mandeville, III et al. (US Pat. No. 6,264,937 B1).

Mandeville, III describes a composition which can be formulated into an oral dosage i.e. tablets comprising a fat-binding polymer (col. 11, lines 21-24). The fat-binding polymers of the prior art can include polyallylamine (col. 4, lines 25-27). These polymers can be substituted or unsubstituted (col. 4, lines 39-42) or they could be linear or crosslinked wherein such cross-linking agents can be epichlorohydrin (col. 5, lines 37-55). Table 1, Column 12, lines 60 through col. 13, lines 1-15 describes examples of epichlorohydrin crosslinked polymers. Example 3, column 12, lines 21-58 describe a method of producing a crosslinked poly(allylamine) HCL. Column 1, lines 48-67 teach that the polymer is used to facilitate the excretion of fat from the body in conjunction with a lipase inhibitor.

Conclusion

4. Claims 1-4 are rejected.
